EXPERIENCE

I worked 3 months in eksathi company as Mern-stack developer.

CERTIFICATE

I have completed the Full-Stack Web Development Course at Error Makes Clever Academy in 3 months.

PROFILE

Dedicated and motivated MERN Stack developer seeking opportunities to leverage HTML, CSS, ,Bootstrap, TailwindCSS, JavaScript, ReactJS, NodeJS, MongoDB, MySQL and to contribute to dynamic and innovative projects in a collaborative team environment.

PROJECTS

GSAP-Animated Portfolio Website:

Designed and developed a portfolio website showcasing various animation techniques using the GreenSock Animation Platform (GSAP). The site features dynamic and engaging animations that enhance user experience and demonstrate proficiency in modern web animation practices. Integrated smooth transitions and interactive elements

Ecommerce App Using React+NodeJS:

Developed a comprehensive web application focused on secure authentication and user management. Implemented robust authentication mechanisms to ensure user data security. Provided features for users to easily add, manage, and remove products.

Chat-Application Using MERN+Socket:

Created a real-time chat application utilizing WebSockets for instant communication. Implemented features such as user-to-user messaging, and presence indicators to provide a seamless and interactive chat experience. Focused on optimizing performance and ensuring low-latency communication for users.

Animated-Portfolio Website:

Built a portfolio website using the React-Spring animation library to showcase projects and skills. Implemented fluid and realistic animations to highlight the portfolio content effectively.

SOFT SKILLS

- 1.Problem-Solving Skills:** Troubleshooting and debugging skills to identify and resolve issues efficiently.
- 2.Collaboration and Teamwork:** Ability to work in an agile and collaborative development environment.
